DETAILED ACTION

1. Claims 38-51 and 53-62 are pending.
2. In view of the amendment filed 10/30/03, the following rejections remains.
3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 38-51 and 53-62 are rejected under 35 U.S.C. 112, first paragraph, containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is a new matter rejection.**

The “antibody **competes for binding** to CD23 with an antibody comprising....of antibody 6G5 or of antibody 5E8” in claims 38 and 47 represents a departure from the specification and the claims as originally filed because said phrase has no support in the specification and the claims as originally filed.

Applicants’ arguments filed 10/30/03 have been fully considered but are not found persuasive.

Applicants’ position is that the specification expressly states that the present invention includes the uses of “antibodies that compete with the primate anti-human CD23 monoclonal antibodies 5E8 and 6G5 for binding to CD23” (page 21, lines 19-21).

In contrast to applicant’s assertion that the specification expressly states that that the present invention includes the uses of “antibodies that compete with the primate anti-human CD23 monoclonal antibodies 5E8 and 6G5 for binding to CD23” (page 21, lines 19-21), the specification discloses the use of primate anti-human CD23 monoclonal antibodies 5E8 and 6G5 for binding to CD23 and not any antibodies that compete with the disclosed human CD23 monoclonal antibodies 5E8 and 6G5 for the claimed method.
5. No claim is allowed.

6. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.
